

Dear [Legislator's Name],

On behalf of Ohio Medicaid Matters, a coalition of the state's leading human services agencies, health advocacy associations and hospital systems, we're writing to reaffirm the critical role Medicaid plays in the lives of millions of Ohioans — and to emphasize the urgent need to preserve and protect this foundational program.

Medicaid is far more than a budget line item. It is a cornerstone of Ohio's health and economic security. Today, Medicaid covers some 3 million Ohioans, including over 1.2 million children, hundreds of thousands of seniors and individuals with disabilities, and those struggling with mental health conditions and substance use disorders. It is Ohio's single largest health insurer, anchoring care delivery in all 88 of our counties and serving as a stabilizing force for our hospitals and providers — especially those in rural and underserved communities.

As the 119th Congress considers policy changes through budget reconciliation, we urge you to oppose proposals that would upend Ohio's Medicaid structure through block grants, per capita caps, work requirements, eliminating or curtailing franchise fees and provider taxes, or changes to the Federal Medical Assistance Percentage (FMAP). These measures would directly undermine the federal-state partnership that has enabled Ohio to design high-performing, cost-effective Medicaid programs that address the diverse needs of our residents.

**Recent state-level developments illustrate what's at stake:**

- **Trigger language in House Bill 96** would automatically end Medicaid expansion in Ohio if the federal match rate were reduced, placing health coverage in immediate jeopardy for **770,000 Ohioans**, including **362,000 in rural counties**.
- Proposals for **block grants and spending caps** would decouple Medicaid funding from real-world needs, threatening cuts to eligibility, benefits and provider payments — especially during periods of economic strain, public health crises or rising costs.
- **Work requirement waivers** risk stripping coverage from individuals facing barriers such as transportation gaps or caregiving responsibilities, which would harm rather than improving health or employment outcomes.

Ohio's Medicaid program is working. Through statewide collaboration, we've made tangible progress in care coordination, behavioral health integration and cost containment. **The 90/10 enhanced federal match for Medicaid expansion has allowed Ohio to make historic strides in reducing our uninsured rate, addressing challenges such as geographic health disparities, and responding to the opioid overdose epidemic.** Rolling back that support

would erase a decade of hard-won progress and inflict long-term harm on families, healthcare providers and Ohio's economy.

Medicaid is a jobs program, an economic stabilizer and a lifeline for vulnerable Ohioans. It reduces uncompensated care, fuels local economies, supports community health care, and helps children grow, adults work, and seniors live with dignity.

We respectfully ask that you stand with the people of Ohio by defending Medicaid from harmful restructuring or cuts. Let us work together to build on what is working, safeguard what is essential and protect those who rely on this program for their health, their livelihoods and their futures.

Thank you for your attention to this vital matter. We welcome the opportunity to speak further or provide additional resources at your convenience.

**Sincerely,**
